

Napkin AI Influencer Strategy Recommendations

1. Target Influencer Niches

To maximize the impact of your influencer marketing campaigns for Napkin.ai, you should focus on creators whose audience is already looking for tools to improve their work, communication, or content.

Here are the top niches, categorized by their relevance to Napkin.ai's core value proposition:

Niche Category	Target Audience	Why It Works for Napkin.ai
Productivity & Workflow	Office workers, students, remote professionals, "life-hack" enthusiasts.	Napkin.ai is a massive time-saver. These creators focus on tools that make work faster and easier.
Business & Consulting	Managers, consultants, entrepreneurs, people who teach business strategy.	These users constantly need to communicate complex ideas clearly in presentations and reports. Napkin.ai helps them look professional instantly.
Content Creation & Marketing	Social media managers, bloggers, LinkedIn creators, people who make visual content for a living.	Napkin.ai helps them create high-quality, on-brand visuals (infographics, diagrams) for their posts without needing a graphic designer.
Education & EdTech	Teachers, professors, tutors, and students.	Napkin.ai simplifies complex topics into easy-to-understand visuals, which is perfect for teaching and studying.
Tech & AI Reviewers	Early adopters, people who follow the latest AI trends.	These creators are always looking for the "next big AI tool." Napkin.ai's unique visual AI approach makes it a great fit for their content.

2. Video Content Requirements for Qualified Campaigns

For an influencer's video to be "qualified" for a performance-based campaign (meaning it's good enough to be run as an ad), it needs to be a short, engaging, and clear demonstration of the product's value.

The best format is a **short-form video** (like a TikTok or Instagram Reel) that follows a simple **Problem-Solution-Result** structure.

Key Requirements for a "Qualified" Video:

Element	Description	Why It's Important
The Hook (First 3 Seconds)	Start with a relatable pain point. Examples: "Stop wasting hours making diagrams in PowerPoint," or "This is how I turn my messy notes into a perfect slide."	Grabs the viewer's attention immediately and makes them feel understood.
The Demonstration	Show the core function: Pasting text and clicking 'Generate.' The speed is the key selling point.	Proves the product works and highlights the "magic" of the AI. The faster the better.
The Use Case	Focus on one specific, high-value task. Examples: Turning a meeting transcript into a mind map, or a blog post outline into an infographic.	Makes the value concrete. The viewer thinks, "I can use this for <i>that</i> specific thing."
The Result & Export	Show the final, polished visual and mention the export options (especially PPT or PDF).	Connects the tool to a real-world professional outcome (e.g., "Now I can put this right into my client presentation").
Call to Action (CTA)	A clear, simple instruction. Example: "Go to Napkin.ai and try the free plan."	Drives immediate traffic and sign-ups, which is essential for a campaign.

Example Video Script Idea (Productivity Niche)

- Hook (0-3s):** *Creator looks stressed, staring at a screen full of text.* "I have to explain this complex project plan to my team, but nobody reads text walls."

2. **Solution (3-8s):** *Creator opens Napkin.ai, pastes the text, and clicks 'Generate.'* "Watch this. I just paste the text into Napkin.ai, and it instantly creates a professional flowchart."
3. **Result (8-15s):** *Show the final, clean flowchart.* "It's fully editable, so I can change the colors to match my brand. And the best part? I can export it directly as a PowerPoint slide. Done in 30 seconds."
4. **CTA (15s+):** "If you need to communicate better, go try Napkin.ai for free."
